MINNESOTA
STUDENT SURVEY

Preparing for the Minnesota Student Survey 2025 Registration

The Minnesota Student Survey registration system requires responses to most items for you to complete registration. If you log out of the system before completing registration for a school, it will bring you back to the last page you were on. Once you complete registration for a school, you can always go back and edit your registration information.

District Assessment Coordinators (DACs) that are listed in MDE-ORG data base will be the contact point for MSS 2025. If your district does not have a DAC, emails will be sent to district or school staff who are listed on MDE-ORG data base.

What should you have on hand to register a school?

- The registration access code/pin number for the school.
- A list of the grade levels you plan to survey. (While the standard grade levels surveyed are 5th, 8th, 9th, and 11th, schools can opt to survey students in 6th, 7th, 10th, and 12th grades.)
- The estimated date you plan to survey each grade level.
- The name and contact information for the district's survey coordinator (or DAC), if that is not you.
